It will be seen by an advertisement in another column that the Michigan Southern and Northern Indiana Railroad Co. are about to issue, for the purpose of aiding in the completion of the Jackson Branch and the Toledo and Golden line, new stock of the Michigan Southern and Northern Indiana Co., to the amount of 23 per cent on the present stock. This stock is to be issued at par to the present stockholders, both of "old" and "construction" stock. The payments are on the 10th of May 25 per cent, 10th of June 22 per cent, and the remainder on the 1st of July. Interest is to be allowed on payments to first of July, when the stock becomes dividend stock.

The earnings of the Macon and Western Railroad Co. for March were:

Passenger... \$219.06

Mail... 1,131.94

Freight... 24,214.98

Total... \$24,561.98

Corresponding month last year... 26,202.71

Increase... \$7,764.27 or 29 per cent.

The Money market continues as before noted, quite easy on call, but time negotiations are difficult. For loans from day to day the supply of money may be considered abundant. Strictly first class paper is in rather better demand than ever.

The advice by the Europa show a continuance of the downward tendency of prices which characterized the market by the last advices. Broadcasts, as will be seen in another column, are still declining, and Cotton is 12d. lower. The Money market was a little easier and the drain of gold to France somewhat checked, but Consols were again lower—about 15 per cent. The London Times of Saturday, the latest date, says:

"Friday Evening—The state of feeling in the Stock Exchange has presented an almost perfect repetition of the winter period, which began in October last, when the idea of a Consul, which had previously fallen one and a half per cent during the week, had to day experienced a further decline of one per cent. There has, however, been a complete absence of any foreign news of importance, the operations of the general public have not been of a character to show alarm; there has been no removal of bullion, heavy or otherwise, and in the course of the market, nothing has been observable but a very disposition on the part of speculators to circulate gloomy forebodings in every quarter. The falling off of £73,846 in the bank bullion, although extremely large, is scarcely so heavy as was anticipated. Consols for money, which left off yesterday at 80, were first quoted at 88 to 1, whence, under a succession of sales they receded to 81. A slight reaction then occurred, and the last official prices were 88 to 2, for 80, and 88 to 1 for the 100. The market was a most remarkable one, of unfathomable turn, and the quotation for the seasonal descended to 88 to 88, a state of things from which, up to the latest moment, there was scarcely any improvement, the only extent of recovery being that there were ultimately buyers at 88. During the last fall a report was circulated of the arrival of the messenger from St. Petersburg with the Emperor's reply, and in the total absence of other news, definitive or indefinite, the market was at rockbottom, and the price of foreign financial failure. Three-and-a-quarter per cent for the options were quoted at 88 to 1. Consols left off at about 88 to 34, to par, and Exchequer bills at 88 to 34 premium to par.

"The foreign stock market was heavy, with a limited amount of business. In Russia Five per Cent purchases were made at a slight advance—viz. 84, and the final quotation was 83 to 82."

The News of the same date says:

"It is noticed as a feature of interest that sales have been made of Stock which had hitherto been sent in in small lots, and large amounts of single stocks have also been removed, notably of a fund of a full per cent. at Paris to day, and of a continued fall in all the other continental bourses, and by an expectation that a declaration of war against Russia will be almost immediately issued."

There were sellers of the scrip of the new French loan at par.

Turkish scrip participated in the general fall, and closed at 1 to 1 premium.

In the foreign exchanges the rate upon Hamburg was again a shade higher. Bills upon Paris were but little in demand, while for St. Petersburg business was transacted at 20d., the nominal quotation being 2d. to 2d., thus showing an increase of distrust.

The subpoena notice was issued by Messrs. Rothschild regarding the Turkish loan:

"Turkish Loan, 6 per cent, in bonds for £2,727,400 stock, redeemable in 15 years at par, by half yearly drawings."

Applications will be received by Messrs. N. M. Rothschild & Sons for this loan until Monday the 27th inst. inclusive.

The price is 85 per cent.

"1st instalment 15 per cent, on allotment.

"2d instalment 10 per cent, in monthly payments.

"3d instalment 10 per cent, in monthly payments.

"4th instalment 20 per cent, in monthly payments.

"Discount allowed at 3 per cent, per annum. The first dividend payable on the 1st of October, 1854."

"New court, St. Swithin's lane, March 24."

The closing quotations from the Paris Bourse show a decline in sympathy with the English market. Prices however, continue higher for money than for the account, indicating that the depression is caused by speculative sales.

Closing prices: Three per cent. Rentes, for money, 63 95; the Four and a half per cent, do, 90 80; Bank shares, 2,650.

It is said that the subscriptions to the National Loan reach the amount of 400,000,000.

P. Monteux & Co., Exchange Brokers of London and Paris, have failed; liabilities £100,000 sterling; probable assets, 10/ per pound sterling.

The return of the Bank of England for the week ending Saturday, March 18, when compared with the previous return, in the following result:

Deposits... \$2,000,515 Decrease... \$375,555

Circulation... 20,753,520 Decrease... 220,560

Public deposits... 3,678,917 Increase... 778,230

Other deposits... 11,383,363 Increase... 47,977

General securities in banking department... 11,844,700 Increase... 96,972

Other securities in banking department... 14,812,935 Increase... 1,430,240

Gold bullion in banking department... 14,222,530 Decrease... 573,545

Seven day and other bills... 1,116,575 Increase... 2,075

The Reserve (less notes and coin in banking department)... 8,038,969 Decrease... 243,201

The News says:

"There is now no feature in the money market. No more pressure experienced, but the minimum rate for discount of first class paper continues as high as five per cent."

"The demand for gold for the continent continues, but little is at present being withdrawn from the bank. The rally in the Paris exchange, if maintained, is calculated to check the efflux of the precious metal."

Hamburg letters of Tuesday state that the price of gold had advanced to 420 marks, owing to the prohibition of its export from Russia; but a large quantity is stated to be on its way to St. Petersburg, destined chiefly for London and Paris. Money was tight at 3 to 3 1/2 per cent.

"Messrs. Baring Brothers & Co. advertise the payment, in due time, of the dividends falling due at the end of the present month on the Boston City Sterling Four-and-a-half per cent. bonds."

There was a rumor of a failure in Paris to the amount of 40,000,000.

The bill to sell the main line of the State Railroad and Canal from Philadelphia to Pittsburgh, for not less than \$1,000,000, has passed the Pennsylvania House of Representa-

tives.

The 150 tons Copper advertised by the North Carolina Copper Company was sold to the Rovere Company of Boston at \$2,30 per cwt.

Markets, CAREFULLY REPORTED FOR THE N. Y. TRIBUNE.

Saturday, April 8, 1854.

ASHERS.—The market is steady but quiet for Rents at 55 1/2 per cent.

COTTON.—The market is dull and very unsettled; sales of 505

FLOUR.—Our market opened with increased firmness and tency for the better grades of Western and State flours, but the lower grades are dull and steady. The arrivals are moderate and sales are slow, and for Western account, Canada is firm at 10 1/2 per cent, and for the Provinces; sales have been 60 to 75 per cent.

FEAR.—Our market opened with increased firmness and tency for the better grades of Western and State flours, but the lower grades are dull and steady.
